

A Home for Every Child Initiative Oklahoma PIP

Oklahoma was presented with an opportunity to shift how states and the federal government monitor and report on practice activities and outcomes related to safety, permanency, and well-being. At the time, Oklahoma had recently initiated its Round 4 Program Improvement Plan (PIP) and was approaching submission of the first required quarterly progress report when the Administration for Children and Families (ACF) released Technical Bulletin #14.

Following review of the bulletin, Oklahoma elected to transition to the revised PIP framework and approach to practice improvement. This shift reflects the state's continued commitment to strengthening outcomes for children and families served by the child welfare system. The overarching goal of the revised PIP process, *A Home for Every Child*, focuses on supporting states in identifying and securing one stable home for every child entering the foster care system.

The following section outlines Oklahoma's strategy for advancing the goal of *A Home for Every Child*. To guide implementation and support measurable practice improvement, Oklahoma identified four primary pillars of practice: (1) safely maintaining children in their homes whenever possible; (2) reducing placement disruptions and adverse placement experiences; (3) identifying and monitoring risk factors at the time of placement; and (4) strengthening the recruitment and retention of foster families to ensure an adequate supply of family-based placement options.

Pillars	Implementation (How are we going to achieve the pillar?)	Monitoring/Lead Measures (How do we know?)
Children remain safe at home whenever possible.	Complete randomized qualitative reviews of Child Safety Meetings (CSM) outcomes. Improve initial and ongoing in-home safety analysis' by identifying acute and patterned needs, risk, and safety factors present within the family and engage the family with prevention and intervention services coinciding with the identified factors. Complete District Director staffings for any consideration of court involvement.	% of substantiated intakes that did not result in placement. Additional investigations following a substantiation within 365 days of resolution.
Children are placed in homes that support stability and connection.	Utilize the Adverse Placement Chart to serve as a decision support tool to ensure	% of children in adverse placements.

Pillars	Implementation (How are we going to achieve the pillar?)	Monitoring/Lead Measures (How do we know?)
	placement decisions are made in the context of a child's unique needs, history, and vulnerabilities. Use the dashboard to identify gaps in kin/foster parent placement. Complete initial assessments and continual reassessments of kinship throughout the duration of the case, ensuring ongoing engagement with family to identify potential kin caregivers and supports.	
Children are placed in homes that keep them safe.	Utilization of the Risk Identification Report to complete elevated joint staffings to address possible MIC incidents. Complete qualitative reviews of policy violations, resource alerts, and written plans of compliance to identify trends and opportunities to improve utilization and communication.	% of placements reaching 90 days with no safety concerns or have a documented monitoring plan.
Homes are well-supported and remain available for children.	Utilization of the Resource Parent Dashboards to identify opportunities to support foster parents. Strengthen individualized recruitment plan strategies that will support the development of foster homes Utilize the lived experience of foster parents to create resources, training, and community support systems	Foster parent survey - % of homes respond with an 8 or higher. Net gain of approved (licensed) and unapproved (unlicensed) homes over a rolling 12-month period

Pillars	Implementation (How are we going to achieve the pillar?)	Monitoring/Lead Measures (How do we know?)
	that directly address the needs of foster parents. Administer the foster parent survey monthly and utilize results to inform support to foster families and retention strategies.
