

Child Welfare Trends, 2019 – 2025

The Safe Reduction Dashboard

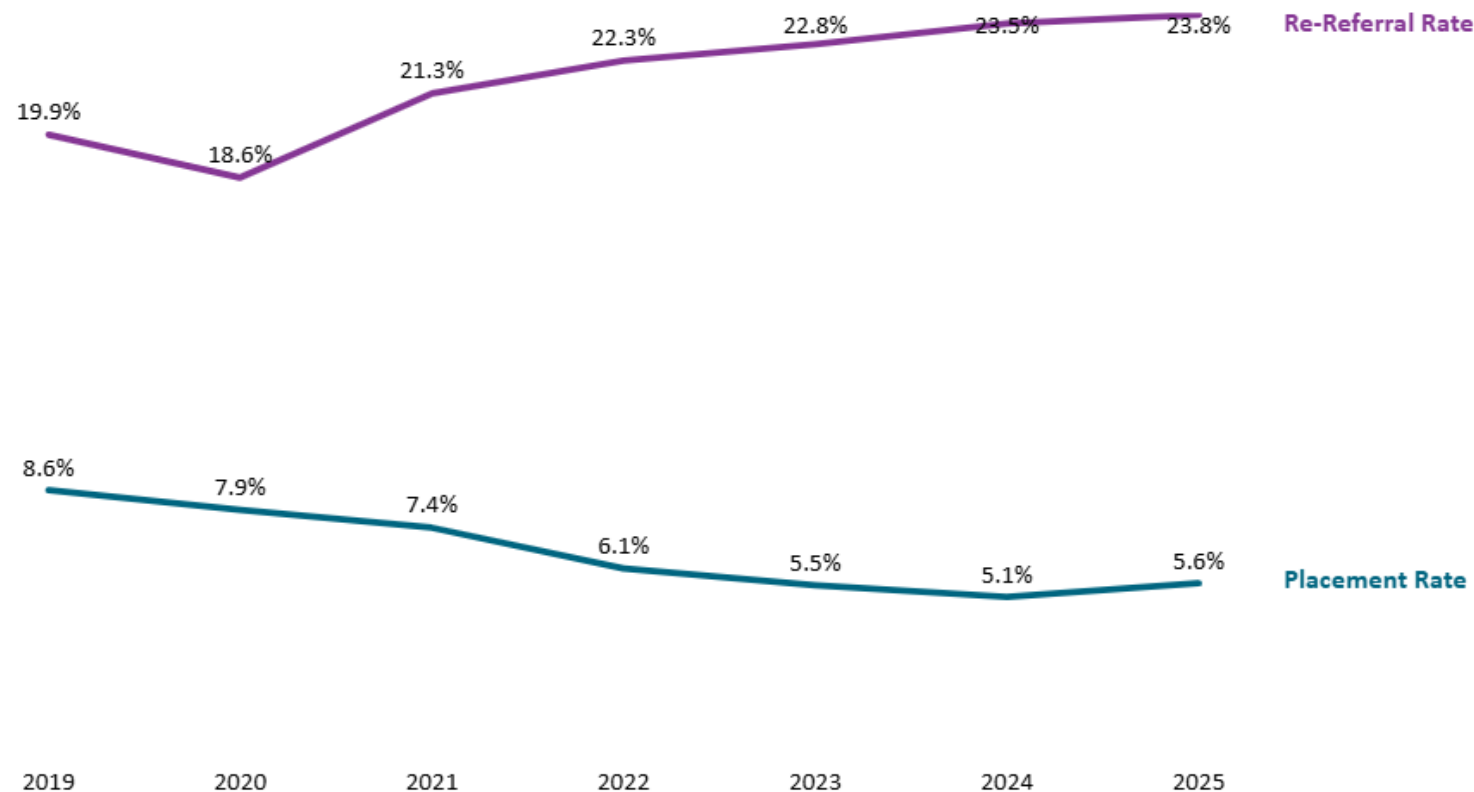

Washington State Department of
CHILDREN, YOUTH & FAMILIES

Between 2019 and 2025, the share of child welfare intakes that resulted in out of home placement **decreased** by three percentage points

During the same period, the share of intakes that had a new referral within 6 months **increased** by almost four percentage points

We reduced out-of-home placements significantly.

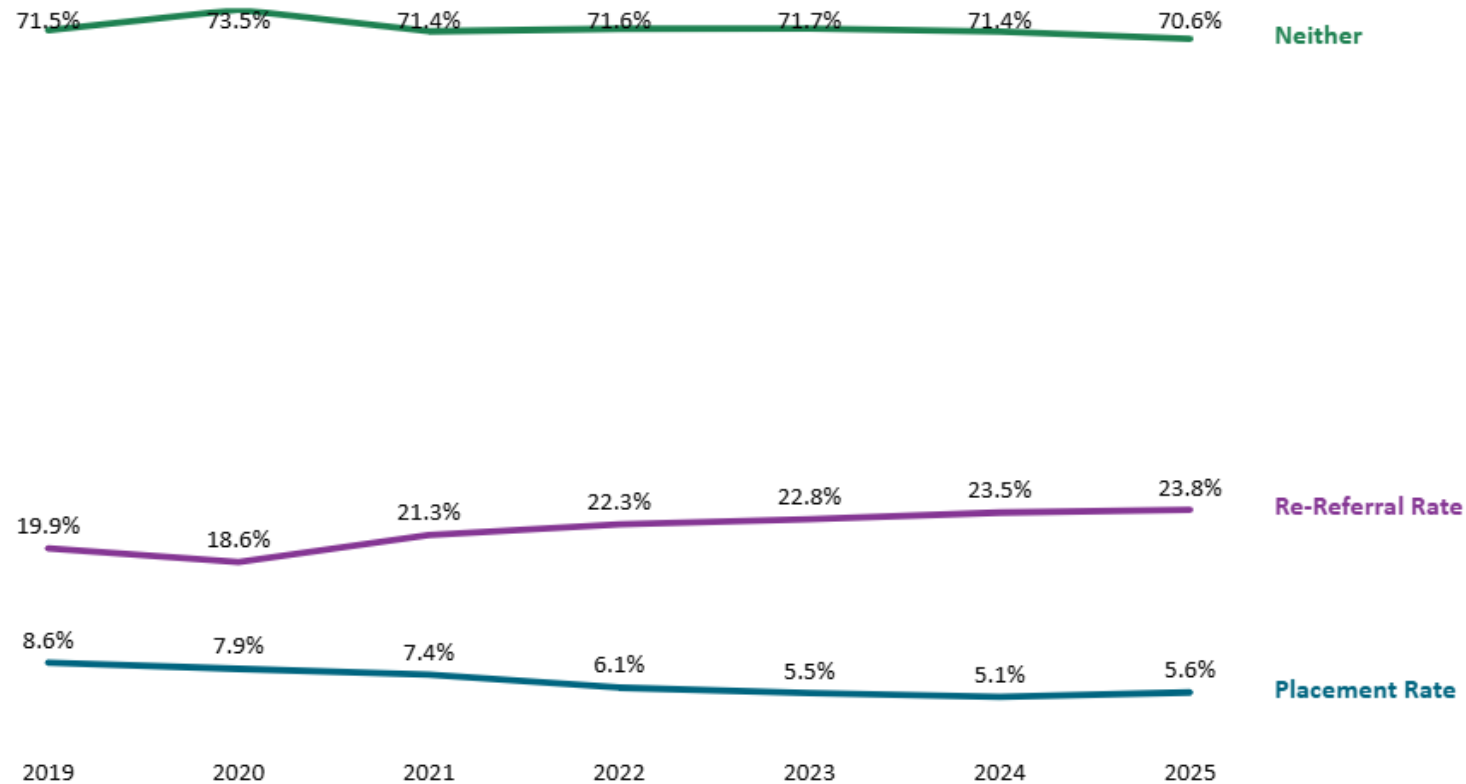

But many children returned to the system.

Why?

Because conditions around the families' resulting in intakes didn't change.

Between 2019 and 2025, the share of intakes that had neither outcome within 6 months **decreased** by almost a percentage point

The Safe Reduction Dashboard

Washington State Department of
CHILDREN, YOUTH & FAMILIES

Introducing: The Safe Reduction Dashboard

Conceptually visualizes the population of children who experience:

- No out of home placement
- No new screened-in CPS intake

These children are represented in **green.**

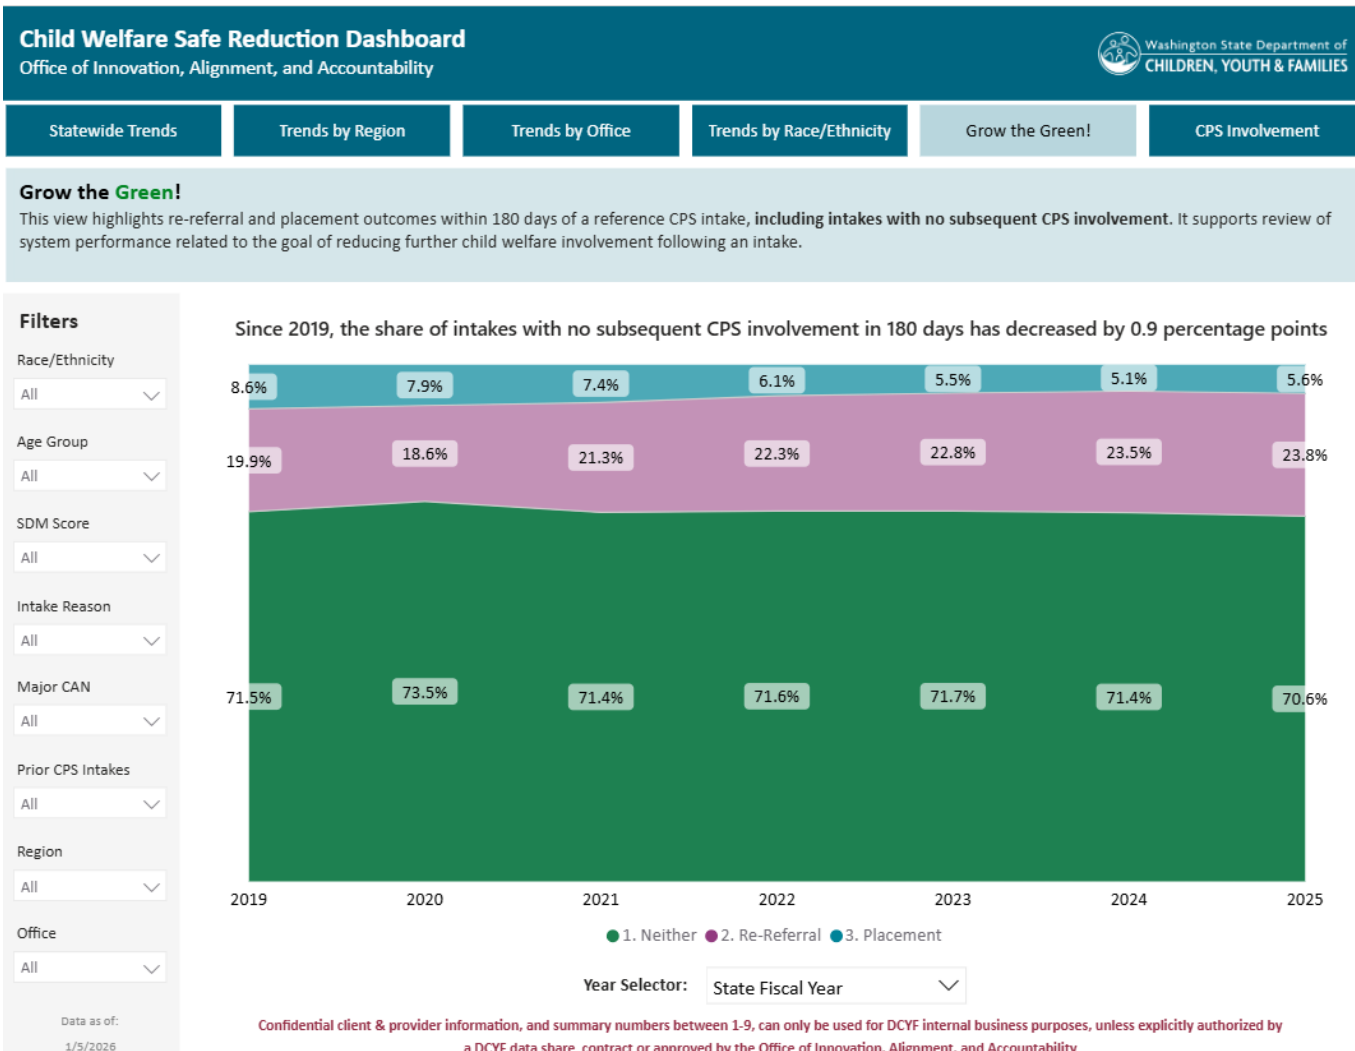

The Safe Reduction Dashboard allows users to view **placement**, **re-referral**, and **neither** trends over time. The dashboard provides different ways to visualize these trends. The 100% stacked area chart to the right visualizes the **percentage share of each outcome over time**. This is just one way to visualize these outcomes – this view is useful when we are interested in parts of a whole.

The dashboard allows users to apply a variety of filters to these trends to see how they differ by race/ethnicity, age, risk level, and other factors.

Angela

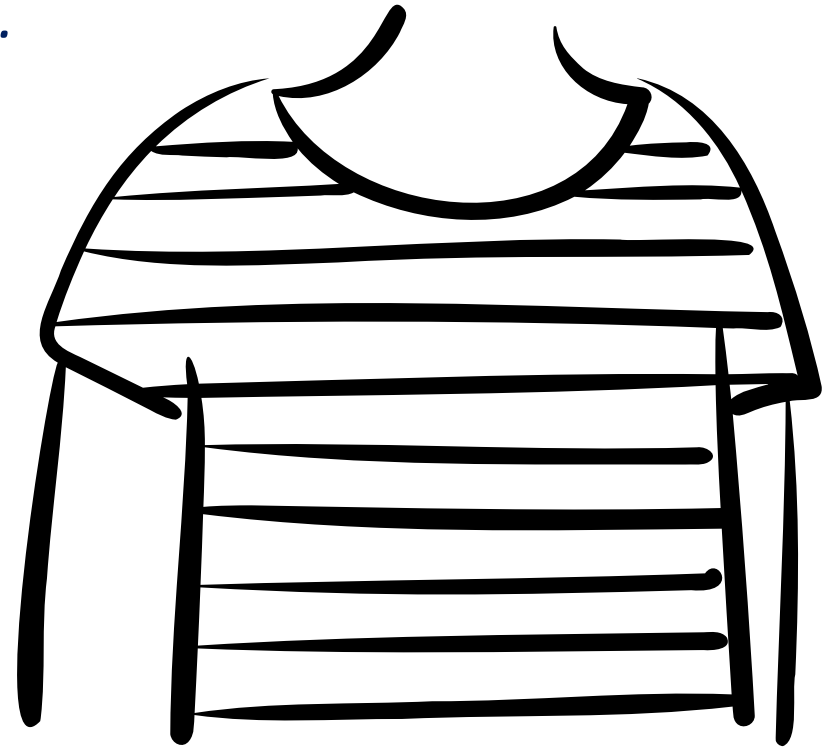

Angela is a first-time mom with a 1-year-old child. She was referred to child protective services for child neglect. There are concerns that she is not properly feeding her child and having inappropriate people care for her child.

Goals and motivation

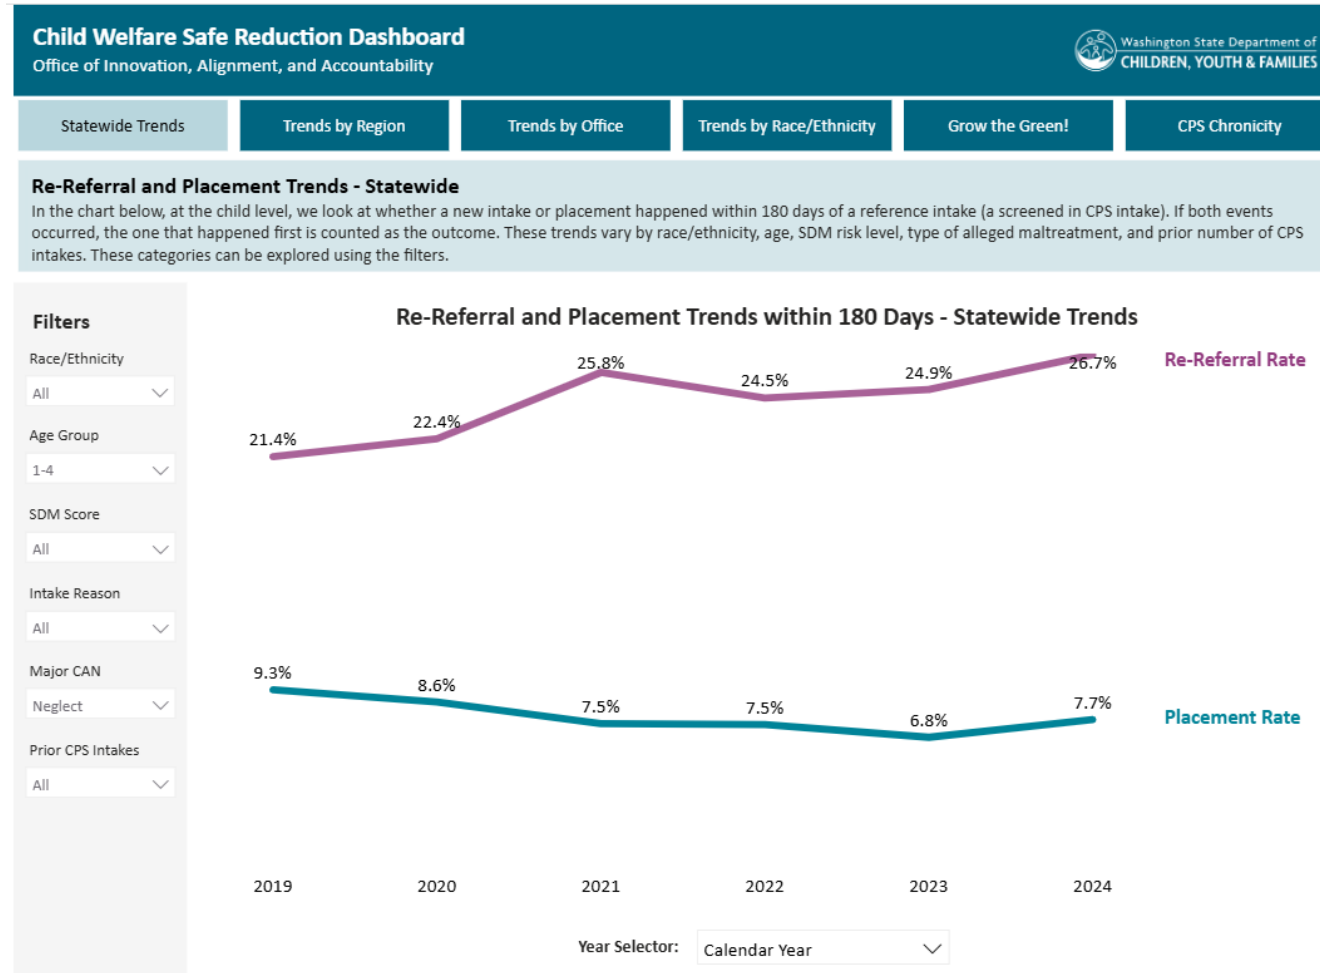

- Wants to feel emotionally stable and confident
- Hopes her child will grow up to be a good person
- Wants to be independent, to no longer need to rely on government assistance

Strength and challenges

- Has a positive outlook
- Has the support of her own parents
- Has cognitive delays that impact her ability to comprehend
- Complex directions, becomes easily overwhelmed

Trends for children age 1-4 referred for neglect

Goals and motivation

- Want a better life for themselves and their children
- Wants stable housing
- Wants to find a job where she can help others

Strength and challenges

- Makes efforts to be involved with their children
- Utilizes the local crisis line and resources when needed
- Struggling with housing stability
- Has a fear of "messaging everything up", of failing
- Feels impossible for to "jump through all the hoops"

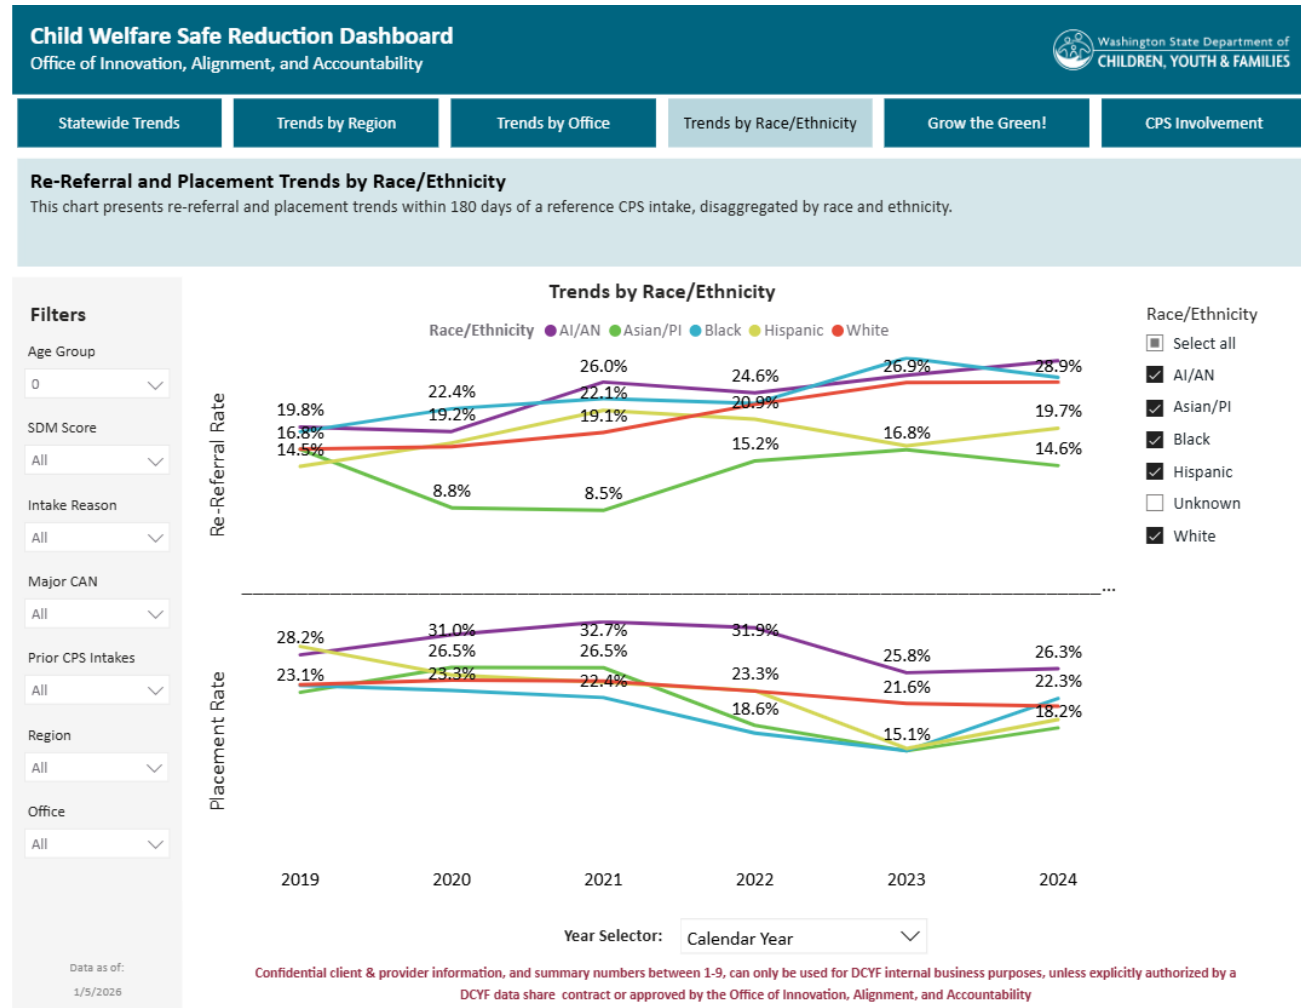

Frank and Pika

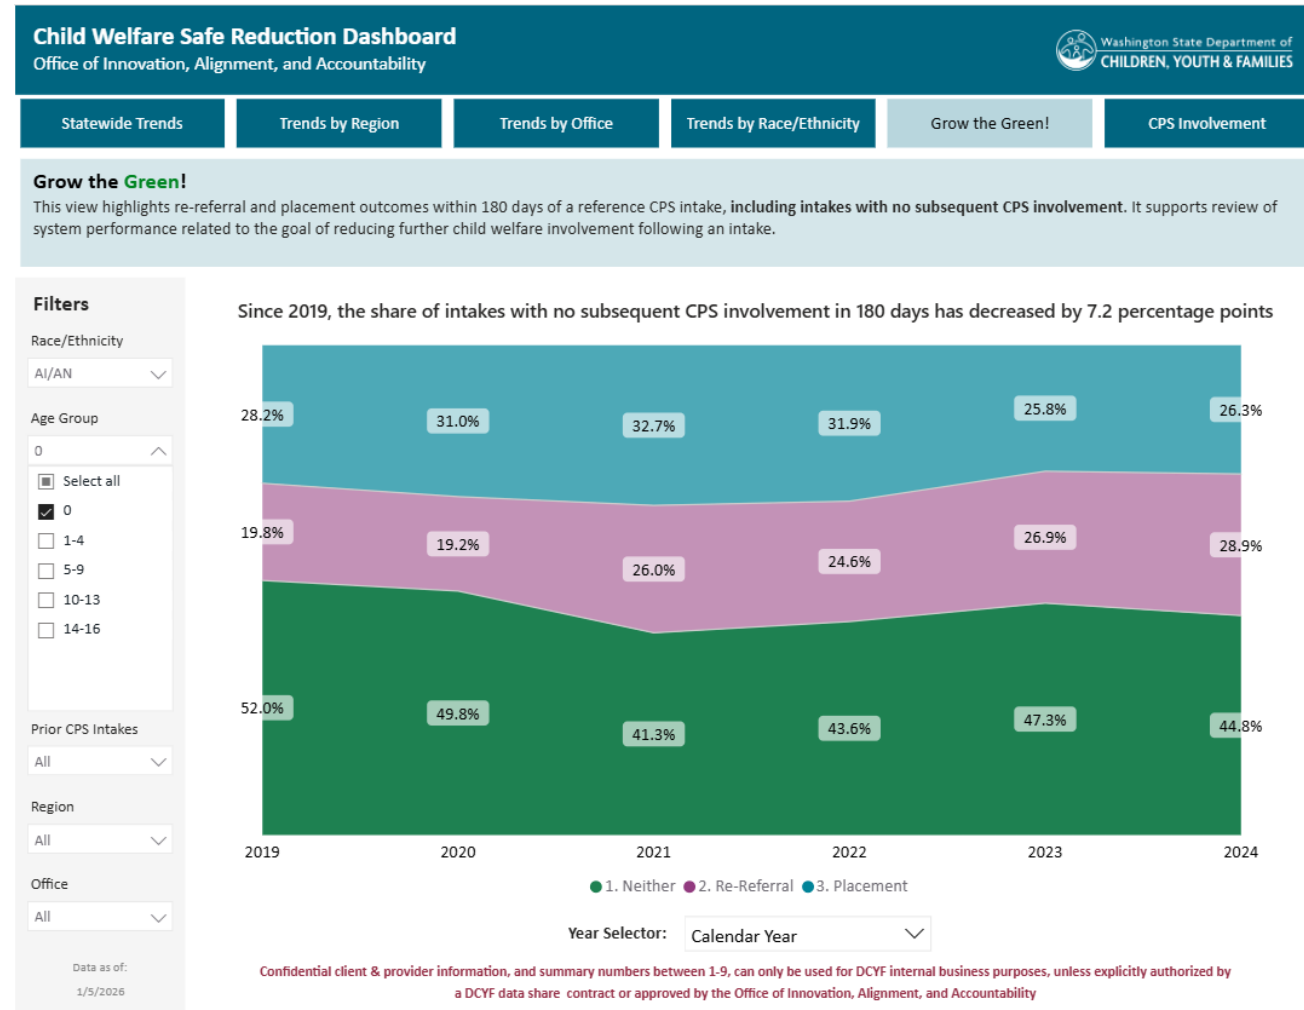

Frank and Pika are American Indian. They have three children, including a newborn. Frank and Pika were referred to child protective services due to concerns that their substance abuse is impacting their ability to meet their children's basic needs.

Trends for Native American/Alaska Native infants

Kylee

Kylee is a mother with a 10-year-old child. Kylee has been involved with Child Welfare off and on since the birth of her child. Kylee was referred to child protective services due to concerns that her depression was impacting her ability to meet the special needs of her daughter.

Goals and motivation

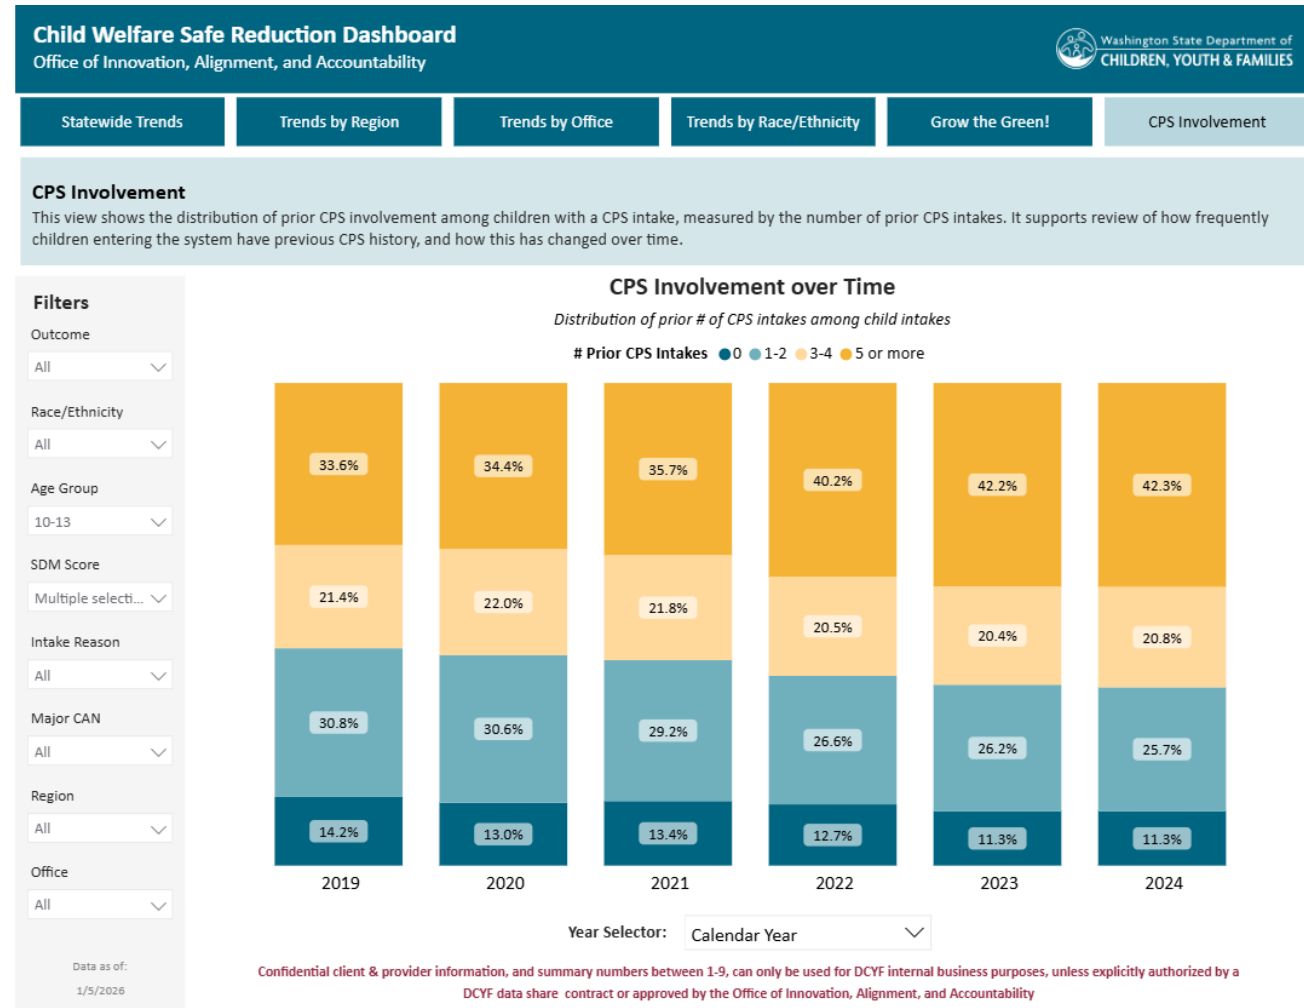

- Wants to provide a stable environment for her daughter
- Wants to stabilize her own functioning so that she can be a more consistent support for her daughter

Strength and challenges

- Has a close relationship with her daughter
- Eager to engage in services to improve her parenting so she can support her daughter
- Parenting a child with special needs

CPS Involvement view displaying prior CPS involvement for children who are assessed as high or moderately high risk according to the SDM risk assessment tool

What does it mean to Grow the Green?

Washington State Department of
CHILDREN, YOUTH & FAMILIES

Growing the Green
means **increasing** the
number of children
who remain safely at
home and outside
the system over time
