

Michigan prevention service referral checklist

Michigan developed this list of prevention identifiers with Chapin Hall to focus their prevention service referrals. They are continuing to update and refine this list.

If you adopt or adapt this list for your own jurisdiction, we would love to hear about it.

Michigan's process:

1. Centralized Intake staff use structured decision-making tool to make screening decision.
2. Centralized intake staff fill out the prevention identifier checklist (below) for all intakes regardless of screening recommendation.
3. Each week, a data analyst extracts a list of caregivers that have a screened-out report with one or more prevention identifiers, adjusting it for additional eligibility criteria.
4. The data analyst sends a finalized list of caregivers to our community partner organizations (211, Family Resource Center, etc.) via a secure file transfer site.

Prevention Identifier Checklist:

- **Child aged 0-3** – any intake participant is age 3 or under.
- **Caregiver < 26 formerly a foster child**
- **Pregnant person in family** – anyone that is identified as pregnant in the household.
- **Domestic violence in the household** - used when the department's definition of domestic violence is present (between intimate partners).
- **Child mental/behavioral health concern** – used when family functioning is impacted by child's mental health or behavior. Consider when a child or youth is assaulting family members, or has severe mental health crises, or is vulnerable to suicide. Consider when caregivers are having difficulty managing those behaviors but are not negligent. No official diagnosis needed.
- **Adult mental health concerns** – used when family functioning is impacted by adult mental health. No official diagnosis needed. This may include PTSD or postpartum depression or any mental health challenge that is negatively impacting the family functioning.
- **Substance Use Disorder – child or adult** – this is used for a disorder not substance use. Used when a family member (child or adult) may need treatment and family functioning is impacted.

- **In-Utero Substance Use:** This is used when a birthing parent has reported substance use while pregnant and/or has had a positive screen for substances while pregnant or during delivery.
- **Child medical needs** – used when a family may not have resources for child's medical needs, such as mobility issues or chronic care needs (oxygen, insulin pump), or medical appointments that are long distance. Consider Failure to Thrive for infants. Also consider when a child is going without a medical assistive device such as glasses, hearing aids, or communication device. Assess if a child maybe in need of speech and language services, occupational and/or physical therapy.
- **Denied Investigation <12 months:** When they had a denied investigation within 12 months of the date of the new intake.
- **Guardianship/Power of Attorney need** – used when a caregiver may need assistance with POA/Guardianship, for instance with help navigating the court system, school enrollment, Food Stamps/Child Care/Medicaid, etc.
- **Child-on-child sexual contact** – used when a family may need assistance with interventions to safety plan around child-on-child contact, like therapy , or a home monitoring system. (Can be sent for prevention consideration only if an additional prevention identifier is marked.)
- **Adult-Child sexual contact:** Transferred to law enforcement. Used when a child is sexually assaulted by a person that CPS does not consider a 'person responsible' and the family may need assistance getting services for the child, like counseling. (Can be sent for prevention consideration only if an additional prevention identifier is marked.)
- **Home conditions** – used for dangerous environmental home conditions, such as hoarding or dilapidated housing and infestations (bugs/rodents).
- **Clothing, food, utilities, or housing** – used for basic and concrete needs like carseats, electric/gas/water bill, home repair, lice treatment, food or clothing shortage. Or if the family is facing housing insecurity.
